**AG Provision, LLC**  
277 Faison McGowan Road  
Kenansville, NC 28349

Dear Teena

Reference: FW USA meets all FSVP for importation of BUTIFOUR

I hereby confirm that Feedworks USA, Ltd., as the FSVP Importer for BUTIFOUR from the Impextraco, Belgium production plant, has assumed all FSVP responsibilities for this product and has determined that it is produced according to the current Good Manufacturing Practices as defined in 21 CFR 507 for feed/animal food and that no additional controls are required to control the identified hazards and to ensure the safety of the product supplied.

Feedworks USA, Ltd. operates according to cGMP standards named above, and also complies with sanitary transportation requirements as follows:

- Use preventative measures to protect BUTIFOUR from contamination or cross contamination by biological, chemical, physical, or radiological agents and
- Prevent the sale or distribution of any BUTIFOUR for which transportation conditions might have rendered the BUTIFOUR unsafe until a qualified individual has determined that the condition did not render the food unsafe;

Feedworks USA, Ltd. further certifies that all transportation equipment used in BUTIFOUR transportation operation is:

- Constructed and designed to be suitable and adequately cleanable for the intended use to prevent the BUTIFOUR they transport from becoming unsafe (adulterated) during transport operations, and
- Stored in a manner that prevents it from harboring pests or becoming contaminated in any manner that could result in feed for which it would be used becoming unsafe (adulterated) during transport operations.

If you have any questions, please do not hesitate to contact me.

Sincerely,

  
Malcolm Ballard  
Partner
