Target audience needs:

Independent consultants and top-40 swine nutritionists and veterinarians seeking more effective solutions to improve post-weaning nursery pig performance.

Recommended Use Directions:

VevoVitall – use 10 lbs./ton of complete swine feed

Not to exceed 0.5% of complete feed

Key Messages:

When fed in initial diets post weaning:

- VevoVitall more effectively supports beneficial intestinal microflora and enhances nutrient digestibility
- VevoVitall improves post-weaning growth rates
- VevoVitall is easy and safe to handle
- VevoVitall lowers ammonia emissions
