

NATURALDE®

ANIMAL FEED ADDITIVE

DIATOMACEOUS EARTH (DIATOMITE)

Introducing NaturalDE Animal Feed Additive (AFA), the diatomaceous earth product that is the perfect mineral for use as an inert carrier or anti-caking agent in animal feeds in an amount not to exceed 2 percent by weight of the total ration. For further manufacture of feed.

The high absorption capacity of NaturalDE AFA makes it an ideal anti-caking agent for use in animal feed to eliminate clumping, especially with bulk storage and transfer applications.

NaturalDE AFA now comes in two different product sizes to meet your needs. The traditional dry powder form and a new fine granular size. We suggest trying both to see what will suit your particular use.

Contact us today for samples!

Features:

- *All Natural, 100% Diatomaceous Earth*
- *Meets U.S. Food Chemicals Codex (FCC) Standards*
- *Organic with No Added Chemicals*
- *OMRI listed*
- *High absorption*
