

Natural Solutions

Aflorin® P L

Flavoring agent when a technical effect is desired during respiratory distress or other stages of stress

ESSENTIAL OILS AS FLAVORING FOR SWINE AND POULTRY DIETS

Ingredients: Propylene glycol, Yucca schidigera extract, Mixture of flavoring compounds (menthol, eucalyptus), Water.

DIRECTION FOR USE:

Drinking water: 0.8 – 3.2 fl oz per 100 gallons of water.

Proportioners set to deliver 1 ounce per gallon of drinking water: Mix 1–4 ounces of Aflorin PL per 1 gallon of stock solution. Run Aflorin PL continuously minimum 2- 3 days. Consult your representative for specific species, stage of growth and desired outcome dosing.

Spraying: 7 oz per 2.5 gallons of water covering 20,000 birds, twice per week or as needed, use fine nozzle.

PRECAUTION: Innovad® recommends to withdraw Aflorin® P L 1 day prior to 2 days post live vaccination! Do not mix with vaccine. More detailed information on application and dosage by species on product description sheet. Contact your Innovad® representative before using the product or before extending its period of use. Shake before use.

USE: FOR USE AS ANIMAL FEEDSTUFF ONLY. STORE IN A COOL AND DRY ENVIRONMENT OUT OF DIRECT SUNLIGHT IN UNOPENED PACKAGING. Colour change or variation does not affect performance.
