

Cleaner

LANXESS

Biosolve™ ACID-A-FOAM XL

**Superior Heavy Duty High Foaming
Cleaner and Descaler**

Foaming acidic cleaner for use in alternating pH programs in hatchery, poultry, turkey, swine, cattle and other animal confinement facilities

For use in food processing facilities

Removes mineral scale, detergent residues and other elements left after repeated use of alkaline cleaners

Excellent end-use compatibility with Lanxess disinfectants

Compatible for use along with Lanxess disinfectants when following label directions

Easy application and rinsing

Formulated with biodegradable detergents

**BREAKS THROUGH SCALE, ORGANIC GRIME
AND MINERAL DEPOSITS**

PHOSPHATE FREE

FOR INDUSTRIAL AND COMMERCIAL USE ONLY

KEEP OUT OF REACH OF CHILDREN

DANGER/PELIGRO

Biosolve™ ACID-A-FOAM XL

**Superior Heavy Duty High Foaming
Cleaner and Descaler**

Components: Sulphamic acid, CAS No. 5329-14-6; Phosphoric acid, CAS No. 7664-38-2; Ethoxylated branched C9-11, C10-rich alcohols (78330-20-8); Glycolic acid, CAS No. 79-14-1; Water (7732-18-5)

DANGER

Hazard Statements: Causes severe skin burns and eye damage.

Precautionary Statements: Wear protective gloves/clothing and eye/face protection. Wash hands thoroughly after handling. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Store locked up.

Dispose of contents and container in accordance with all local, regional, national and international regulations.

Do not taste or swallow. Wash thoroughly after handling. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink.

WARNING: This product contains a chemical known to the State of California to cause cancer.

LANXESS

Biosolve™ ACID-A-FOAM XL

**Superior Heavy Duty High Foaming
Cleaner and Descaler**

Biosolve™ Acid-A-Foam XL Heavy Duty High Foaming Cleaner and Descaler is used as a general cleaner in an alternating pH program for hatcheries, poultry, turkey, swine, cattle and other animal confinement

Alternating between Lanxess alkaline, neutral, and acid-based cleaners maximizes surface cleanliness and, therefore, prepares the surface for the second step of disinfection.

Biosolve™ Acid-A-Foam XL is used in poultry hatcheries to clean walls, floors, ceilings of rooms, processing equipment, setters and hatchers. Biosolve™ Acid-A-Foam XL is used in poultry, swine and meat processing plants. It is used for floors, walls and shelves, processing equipment, utensils and walk-in coolers. It cleans and brightens stainless steel, glass, plastic, concrete and tile in poultry, meat and canning plants.

Directions for Use

Foaming: Prepare a (1-3 ounces per gallon) (8-24 ml/liter) stock solution of Biosolve™ Acid-A-Foam XL, or calibrate your dosing equipment to achieve this dilution. Apply using a foam lance onto all surfaces at an application rate of 0.8 oz/ft² (250 ml/m²). Allow a contact time of 5-10 minutes before thoroughly rinsing all surfaces with clean water at high pressure. After thorough cleaning and rinsing, let surfaces dry as much as possible and then follow-up with an appropriate Lanxess disinfecting solution. Consult a Lanxess Technical Representative for recommendations.

facilities to remove detergent residues, mineral scale, dirt, grime, protein, and oils as well as minerals and adherent films.

Low or High Pressure Washing: Prepare a stock solution of Biosolve™ Acid-A-Foam XL (0.25-3.0 ounces per gallon) (2-24 ml/liter), or calibrate your dosing equipment to achieve this dilution. Spray the solution onto all surfaces at an application rate of 1.6 oz/ft² (500 ml/m²). Using hot water (130-160°F/54-71°C) will improve the effectiveness of the product, particularly in high grease situations. Allow contact time of 5-10 minutes before thoroughly rinsing all surfaces with clean water at high pressure. After thorough cleaning and rinsing, let surfaces dry as much as possible and then follow-up with an appropriate Lanxess disinfecting solution. Consult a Lanxess Technical Representative for recommendations. **Note:** Must use compatible O-Ring seals.

Food Processing Equipment, Utensils and Other Food Contact Surfaces:

Follow foam cleaning instructions. Thoroughly rinse cleaned surfaces with potable water before they are reused. Where recommended or permitted, apply a sanitizer solution to food contact surfaces before reuse.
