

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

CAUTION Do not use in nurseries or rooms where infants, ill or aged persons are confined. Do not install directly over or within 12 feet of any food handling or dispensing area. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.

Do not use in public areas while customers are present. Do not use where people will be continuously exposed. Inform employees of the nature and purpose of material being automatically dispersed.

Cover or remove fish bowls and aquariums when in use.

Facilities and equipment in meat and poultry plants must be washed with an effective cleaning compound followed by potable water rinse after spraying.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL BEFORE EACH USE.

FOR USE IN AUTOMATIC DISPENSERS:

Install at a distance of seven (7) feet from the floor and where air currents will carry spray throughout room. One dispensing unit should be installed for each 6,000 cubic feet of space to be treated. Set the dispenser to activate the 54 mg. valve once every 15 minutes. Usually the effectiveness will be noticeable within one hour after the dispenser is activated. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperatures all affect insect activity and control. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed. This 6 ½ oz. can of insect killer contains approximately 3,400 "shots" sufficient to sustain operation for a total of 850 hours (35 days on around-the-clock basis).
