

LINCOBAC 300- lincomycin injection
MWI/VetOne

LincoBac™ 300

(lincomycin injection, USP)

Injection

Swine Antibiotic

For use in swine weighing 300 pounds or more.

For Intramuscular Use in Swine Only

LincoBac™ 300 contains lincomycin hydrochloride, an antibiotic produced by *Streptomyces lincolnensis* var. *lincolnensis* which is chemically distinct from all other clinically available antibiotics and is isolated as a white crystalline solid.

ADVERSE REACTIONS: The intramuscular administration to swine may cause a transient diarrhea or loose stools. Although this effect has rarely been reported, one must be alert to the possibility that it may occur. Should this occur, it is important that the necessary steps be taken to prevent the effects of dehydration.

DOSAGE AND ADMINISTRATION: For arthritis or mycoplasma pneumonia – 5 mg per pound of body weight intramuscularly once daily for three to seven days as needed.

One mL per 60 lb body weight will provide 5 mg/lb.

For optimal results, initiate treatment as soon as possible.

As with any multi-dose vial, practice aseptic techniques in withdrawing each dose. Adequately clean and disinfect the vial closure prior to entry with a sterile needle and syringe. No vial closure should be entered more than 20 times.

□**HOW SUPPLIED:** 100 mL multiple dose vial.

INDICATIONS FOR SWINE:

LincoBac™ 300 is indicated for the treatment of infectious forms of arthritis caused by organisms sensitive to its activity. This includes most of the organisms responsible for the various infectious arthritides in swine, such as staphylococci, streptococci, *Erysipelothrix* and *Mycoplasma* spp. It is also indicated for the treatment of mycoplasma pneumonia.

□**STORAGE:** Store at 20°-25°C (68°-77°F). Protect from freezing.

CONTRAINDICATIONS: As with all drugs, the use of **LincoBac™ 300** is contraindicated in animals previously found to be hypersensitive to the drug.

Container Label Section

For Intramuscular Use in Swine Over 300 lbs.

DOSAGE: Usual daily dose for arthritis or mycoplasma pneumonia - 5 mg per pound of body weight (1 mL per each 60 pounds of body weight) intramuscularly for three to seven days. See package insert for complete product information.

Residue Warning: Swine intended for human consumption should not be slaughtered within 48 hours of latest treatment.

HUMAN WARNINGS: Not for use in humans. Keep out of reach of children.

STORAGE: Store at 20°-25°C (68°-77°F). Protect from freezing.
