New-Hoof™ is a ionized foot bath additive that helps maintain normal hooves. In combination with proper hoof and good herd management practices, New-Hoof™ contains ionized copper along with surfactants.

How to Use: Use New-Hoof™ in a foot bath as part of your hoof care program. Prepare the foot bath by mixing one part of New-Hoof™ with 50 gallons of water (approximately 100 lbs of water). Change the foot bath solution every 500 heads. It is recommended to use New-Hoof™ in combination with other foot bath additives. When using other foot bath additives, prepare a separate foot bath. New-Hoof™ is a concentrate and two parts water. Use a spray bottle to spray and spray thoroughly. Continue to use New-Hoof™ as needed.

New-Hoof™ is environmentally safe. After use, New-Hoof™ is broken down in the manure and does not have any harmful effects on the environment. As with any product, follow label guidelines for safe use.
