

Contains a source of live, viable naturally occurring microorganisms

For Administration via Drinking Water

Guaranteed Analysis

Total bacteria count: 2×10^7 cfu/g

Ingredients

Dried *Bacillus lichenformis*, Dried *Lactobacillus casei* fermentation product and Citric Acid

Directions

Use 1 packet (28 g) per day to supplement the drinking water of 1,200 pigs. Add the entire contents of 1 packet into the recommended volume of stock solution. Use ONLY cool water for mixing. After emptying contents of packet, fill packet with water and pour contents into stock solution and additional cool water to desired volume. Use NutriQuest Swine Awake in the drinking water for 21 consecutive days.
