

PROVENT[®] ECL/1 PLUS

Product 1758

A liquid dispersible microbial source of live (viable) naturally occurring microbial strains for swine.

GUARANTEED ANALYSIS

Total Microbial Count (min) 9.44⁹ CFU/g

(Bacillus subtilis, Bacillus pumilus, Lactobacillus plantarum, Pediococcus acidilactici)

INGREDIENTS

Bacillus spp. organisms and Maltodextrin

DIRECTIONS FOR USE

Drinking Water Administration: Mix one 50 gram packet per 1 gal of stock solution metered at 1 oz per gallon or 128 gallons of treated water. Stock solution should be used up completely in a 24 hour period. The stock solution container should be cleaned before making a new batch of stock solution. Do NOT reuse previous day's stock solution. Continue dosing period for 7 days.

- Each packet will dose 500, 12 lb. weaned pigs for 24 hours. If dosing heavier pigs, simply more gallons of stock solution will be used.
- Ideally, begin using product at least 1 week before a known disease event historically occurs.

Important : After water therapy is discontinued, feed ProVent ECL at 1lb per ton of complete feed.

STORAGE AND HANDLING

Store in a cool, dry place, out of direct sunlight. Avoid contact with skin and inhalation of dust.
