

### ADVANTAGES

- More concentrated formula means added convenience and less handling
- Faster wetting and improved solubility results in less time spent mixing vaccine
- Activates immediately to rescue vaccine from the harmful effects of tap water, no waiting required
- Blue dye provides visual assurance that the stabilizer has been added and identifies treated birds
- Specially engineered to preserve the livability of mixed vaccine and sustain effectiveness over longer vaccination times
- Will not clog drinkers

### INGREDIENTS:

Vaccine Stabilizing Compounds, Disodium salt of 6-hydroxy-5-[(2-methoxy-5-methyl-4-sulphophenyl)azo]-2--naphthalenesulfonic acid.

Manufactured By  
**Animal Science Products, Inc.**

**NET CONTENTS**  
**4 OUNCES**  
**(113.4g)**

**NEW GENERATION STABILIZER WITH DYE**  
**FOR POULTRY AND SWINE VACCINES**

### DIRECTIONS FOR USE

Before diluting vaccine in the stock solution, prepare the water by adding Vac-Pac Plus® according to the directions below.

Dissolve 1 pack (4 oz) of Vac-Pac Plus® into each 2 gallons of stock solution to be metered at 1 oz/gal (1 pack stabilizes 256 gallons of drinking water).

Uniform distribution of the blue dye in the stock solution assures the stabilizer is thoroughly mixed, and the stock solution is immediately safe and ready to receive the vaccine.

Mix the vaccine into the stock solution according to the manufacture's directions.

### CAUTION

Not for spray, aerosol, or injectable vaccine applications.  
This product is specifically formulated for water administration only.

Store in a cool, dry place.  
Keep out of reach of children.  
Not for human consumption.
