VITAL E[®] - Repro

**Vitamins E, A and D
Injection**

NOT FOR HUMAN USE

**KEEP OUT OF REACH
OF CHILDREN**

Each ml contains: 300 International Units of Vitamin E (as *d-alpha*-tocopherol, a natural-source of vitamin E), 200,000 I.U. vitamin A (as retinyl-palmitate) and 100,000 I.U. vitamin D (as cholecalciferol) compounded with 18% ethyl alcohol and 1% benzyl alcohol (preservative) in an emulsifiable base

NET CONTENTS: 250 mL

Indications:

VITAL E-Repro is a clear, sterile, non-aqueous solution of vitamins E, A, and D for use as a supplemental source of those fat-soluble vitamins in cattle, sheep and swine. Each mL provides vitamin E in its highest biologically-available form - *d-alpha*-tocopherol, the same form found in colostrum and milk.

Intramuscular or subcutaneous injections of VITAL E-Repro offer an efficient and rapid method to increase status of fat-soluble vitamins E, A and D in animals.

CAUTION: Anaphylactoid or allergic reactions, which may result in deaths, may occur in individual animals. Should such reactions or hypersensitivity occur, treat immediately with injection of epinephrine and/or antihistamines.

Do Not Exceed Recommended Dosage.

IMPORTANT: Store between 40° to 78° F (4° - 26° C). Protect from freezing.
