

Revitalizing nutrition & health

Safety Data Sheet

1. Product and Company Identification

Product Name:

Baby Pig Restart 1-4

Product Code:

10518187, 10518186

Use of the Substance/Preparation:

For use as feed supplement for swine

Manufacturer:

Form A Feed
740 Bowman Street
Stewart, MN 55385

Emergency Telephone Number:

1-877-466-6455

SDS Information:

TechMix, LLC
740 Bowman Street
Stewart, MN 55385
1-877-466-6455

info@techmixglobal.com

2. Hazard Identification

Classification: Organic Dust

Label Elements: Signal Word: N/A due to FDA labeling exemption

Hazard Statement(s): May create a flash fire or explosion hazard if dust of certain particle size is suspended in air at sufficient concentration IN A CONFINED SPACE and exposed to an ignition source.

Precautionary Statement(s): Danger of adverse health effects by prolonged exposure. May be mechanical eye irritant. Rinse eyes with water for several minutes. Avoid breathing dust. Excessive inhalation may affect nose throat, and lungs. Feed dust may burn if suspended in air and may create a flash fire/ explosion hazard. Avoid ignition sources.

Emergency Overview: May be mechanical irritant to eyes. Excessive inhalation of feed dusts may affect nose throat, and lungs. May form combustible dust concentration in air; see "Explosion Hazard" below.

Explosion Hazard: Feed is generally considered not hazardous, but dust generated through downstream activities that may reduce its particle size (e.g., shipping, handling, transfer to bins, etc.) may create a hazardous condition.

If exposed to an ignition source, feed dust may burn. Airborne dust in sufficient concentrations when exposed to an ignition source may flash or, in a confined situation, may fuel an explosion.

3. Composition/Information on Ingredients

Ingredients: Dried Whey, Dextrose, Dried Milk Feed Grade, Bovine Plasma, Animal Fat, Vegetable Oil, BHA (preservative), BHT (preservative), Whey Protein Concentrate, Condensed Whey, Sodium Silico

Aluminate, Mono and Diglycerides of Vegetable Oil, Partially Hydrolyzed Animal Fat, Calcium Carbonate, Potassium Chloride, Artificial Flavors, Monosodium Phosphate, Sucrose, Salt, Fructose, Sodium Bicarbonate, Natural Flavors, Calcium Acetate, Glycine, Magnesium Acetate, Artificial Sweetner, Calcium Lactate, Vitamin D3 supplement, DL Alpha Tocopheral Acetate, Choline Bitartrate, Niacinamide, Ascorbic Acid, Pantothenic Acid, Riboflavin, Biotin, Pyridoxine, Thiamine, Folic Acid, Dried Lactobacillus Acidophilus Fermentation Product, Dried Enterococcus Faecium Fermentation Product, Dried Bacillus Subtilis Fermentation Product, Dried Bifidobacterium Bifidum Fermentation Product, Dried Lactobacillus Lactis Fermentation Product, Dried Enterococcus Diacetilactis Fermentation Product, Maltodextrin, Sodium Silico Aluminate, Citric Acid, Dried Skimmed Milk, Salt, Blue #1.

4. First Aid Measures

Inhalation: Causes respiratory tract irritation. Remove from exposure and move individual to fresh air. If not breathing give artificial respiration. If breathing difficult, give oxygen. Get medical attention if cough or other symptoms appear.

Ingestion: Never give anything by mouth to an unconscious person. Do NOT induce vomiting. If conscious and alert, rinse mouth and drink 2-4 cups of milk or water. Get medical aid if irritation or symptoms occur.

Skin Contact: Causes mild skin irritation. Flush with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists. Wash clothing before reuse.

Eye Contact: Causes eye irritation. Flush with water for 15 minutes occasionally lifting the upper and lower eyelids. If irritation develops, get medical attention.

5. Fire Fighting Measures

Hazardous Combustion Products: Dust, carbon oxides

Special Fire Fighting Procedures: Wear full protective clothing and NIOSH approved self-contained breathing apparatus with a full face piece operated in the positive pressure or pressure demand mode.

Unusual Fire and Explosion Hazards: Avoid generating dust; fine dust dispensed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

6. Accidental Release Measures

Clean up with soft bristle broom(s) and use as intended if not contaminated. If contaminated, dispose of properly. Clean up all spills immediately and observe precautions regarding personal protective equipment.

Dust deposits should be maintained to a minimum on surfaces, as these could form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air in the presence of ignition source should not be allowed). Non-sparking tools should be used.

7. Handling and Storage

Handling: Wash thoroughly after handling. Wash hands before eating. Use adequate ventilation. Avoid contact with eyes. Keep container tightly closed. Avoid ingestion and inhalation. Wash clothing before reuse.

Storage: Store tightly in closed container. Store in a cool, dry, well-ventilated area. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions such as electrical grounding and bonding of inert atmospheres. Store away from incompatible materials.

Avoid dispensing dust in air and exposure to potential ignition sources. Remove feed dust from area/processing equipment prior to using any heat producing equipment such as arc welders, cutting torches and spark/heat producing tools such as portable surface grinders.

8. Exposure Controls/Personal Protection

Respiratory Protection: Follow OSHA respirator regulations found in 29CFR1910.34. Always use a NIOSH approved respirator when necessary.

Ventilation: Use adequate ventilation to keep airborne concentrations low.

Local Exhaust: If needed

Mechanical (General): If needed

Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work areas. Use only appropriately classified electrical equipment and powered industrial trucks.

Protective Gloves: Wear appropriate protective gloves to prevent skin exposure.

Eye Protection: Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations 29 CFR 1910.133.

Work/Hygienic Practices: Good personal hygiene practices should be followed. Wash hands and face before eating, drinking, etc.

Avoid dust accumulation and control ignition sources. Where appropriate, employ grounding, venting, and explosion relief provisions in accordance with accepted engineering practices in processes capable of generating dust and/or static electricity. Avoid accumulation of dust on surfaces to prevent secondary dust explosions. Refer to appropriate OSHA, NFPA and applicable standards.

9. Physical and Chemical Properties

Flash Point (Method): N/A

Flammable Limits: N/A

LEL: N/A

UEL: N/A

Autoignition Temperature: N/A

Appearance: Powder color varies from off white to cream and has a sweet odor.

Solid Contents: 95%

10. Stability and Reactivity

Stability: Stable

Condition to Avoid: N/A

Incompatibility (Materials to Avoid): Strong bases, alkali metals, metal nitrates, oxides of sulfur, potassium tartrate. Will corrode copper, zinc, aluminum and their alloys. Avoid contact with hot nitric acid, may cause evolution of toxic nitrosyl chloride. Contact with strong acids may produce irritating hydrogen chloride gas. May react with bromine trifluoride and may explode if mixed with potassium permanganate and sulfuric acid. Can react with most noble metals and building materials.

Hazardous Decomposition or Byproducts: None known

Hazardous Polymerization: Will not occur

Condition to Avoid: N/A

11. Toxicology Information

Routes of Entry

Inhalation: Yes

Skin: Yes

Eyes: Yes

Ingestion: Unlikely

Carcinogenicity: None known

NTP: No

ARC Monographs: N/A

OSHA Regulated: This product is hazardous according to OSHA 29CFR 1910.1200

Acute: May cause eye irritation. Low hazard for usual industrial handling. Ingestion of significant amount may cause gastrointestinal upset.

Chronic: May cause eye irritation. May cause erosion of exposed teeth. Low hazard for usual industrial handling.

Target Organs: Respiratory system, eye, lung, teeth.

Signs and Symptoms of Exposure: Coughing, skin irritation, eye redness, irritation of nose, throat, and digestive tract, nausea, vomiting, diarrhea, abdominal cramping, irregular heartbeat (arrhythmia), dehydration, and hypertension.

Medical Conditions Generally Aggravated by Exposure: Conditions aggravated by exposure may include kidney disorders and high blood pressure (hypertension). High dust exposure should be avoided by people with pulmonary disorders. Product contains bovine and milk products, those with an allergen to bovine and/or milk products may have a reaction if ingested.

12. Ecological Information

Ecotoxicity: May be harmful to fresh water aquatic species and plants that are not salt tolerant if released in large quantities.

Environmental: No information available

Physical: No information available

Other: No information available

13. Disposal Considerations

Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

14. Transport Information

USDOT: Not Regulated

Hazard class: N/A

15. Regulatory Information

Section (b)(5)(iii) of the HCS (CFR 1910.1200) exempts food, including feed and therefore any associated feed dust, from the labeling requirements of the HCS since the food/feed is subject to the labeling requirements of the Food and Drug Administration.

16. Other Information

Animal feed is comprised of whole and processed grains and may contain added vitamins and minerals. Feed components generally produce a limited amount of dust in manufacturing and handling of the material.
